## Emergency Grab and Go Bag

Life Members receive/are eligible to receive a backpack that can be carried on one's person or in an easily accessible location. The purpose of the backpack is to ensure the individual has immediate access to essential items needed to remain safe, independent, and medically stable for 24–72 hours (food/water rations, fire blanket, medical supplies, etc.).

These are usually issued to you by the Clement J. Zablocki SCI Center while you are inpatient or during your annual physical. If you have never received one, please click the link below to request one.
